SOLUTIONS

A Guide to our Services

Passionate about Developing Innovative
Solutions for Engineering Support

At Sonovision...

...we invest in our expertise, our capabilities, and our team. We broaden horizons around us, through the diversity of our experience. Perfection has to do with the end product, but excellence is refined through our process. We approach historic questions with innovative solutions by working together. We build relationships that last, by listening, learning and going beyond expectations. Sonovision engineer solutions that challenge boundaries across sectors and enhance industries. We thrive on and embrace change; **because we are motivated to build the future.**

Engineering and Support

Design Engineering

Design Engineering

Our teams work alongside global OEMs to provide engineering design services. We apply our expertise and innovation from needs analysis, through to critical design stages.

Tooling Manufacture

Tooling Manufacture

We apply our expertise in tooling design and manufacture, utilising the most suitable subtractive or additive manufacturing technologies, offering end-to-end project management from prototype to serial production.

In-Service Support

In-Service Support

Our In-Service Support teams provide cost-effective engineering and programmatic services to help manage the life cycle of platforms and structures, design support for technical process and operational change.

Creative Services

Marketing & Communications

Marketing & Communications

Our integrated design agency provides innovative, creative solutions and our engineering expertise and technical understanding enables our clients to improve their marketing effectiveness.

3D Animation

3D Animation

We provide a wide range of 3D modelling services, utilising our knowledge and expertise to create high quality 3D models, built from reference images, engineering drawings or physical products.

Extended Reality (XR)

Extended Reality (XR)

Our immersive development team's expertise and capabilities create experiences using XR solutions to engage learners, improving the productivity, proficiency and effectiveness of training and maintenance activities.

Training/ E-Learning

E-Learning / Blended Learning

We provide E-Learning / Blended Learning solutions for maintenance, safety and operation training. Our technical experts develop high quality, engaging content across multiple sectors and technologies.

Integrated Product Support

Integrated Logistic Support

Integrated Logistic Support (ILS)

We provide Logistic Support Analysis expertise to support the lifecycle of a system, by applying processes and integrating tools according to industry standards (S-Series), reducing cost and increasing return on investment.

Technical Documentation

Technical Documentation

We are experts in the preparation and delivery of a full range of Technical Documentation across multiple sectors. Our first-class service supports clients worldwide, offering solutions tailored to specific requirements.

Provisioning Support

Provisioning Support

We provide advanced consultancy services around spare parts provisioning necessary for the production and operation of global systems. Our own S2000M software manages all business and technical aspects required.

Data Conversion

Data Conversion

Our innovative conversion service converts legacy data effectively and efficiently, including developing a unique S1000D or ATA2000 (iSpec2200) solution to fit the exact requirements of our clients.

Technical Translation

Technical Translation

We have extensive technical translation project management experience across multiple languages. We utilise in-house expertise in Neuro Machine Translation and experts in the field of complex engineering.

Robotic Process Automation (RPA)

Robotic Process Automation (RPA)

We have developed a variety of RPA applications to increase efficiency in data processing. The software applications (BOTs) perform a variety of repetitive tasks efficiently, resulting in cost benefits for our clients.

Training Solutions

The ORTEC Group is a 1.1bn euro international multi-service group dedicated to providing solutions and support services to clients around the world.

Sonovision is part of The ORTEC Group's specialist engineering support services division responsible for the processing of complex systems data entrusted by our clients in order to enrich them with innovative solutions through the lifecycle of products. We are passionate about developing engineering support solutions, our focus is optimising the delivery of Operational Excellence, Customer Service and Innovation.

With a vast international presence, we offer local support with global benefits.

Contact your local Sonovision agency for more information.
